PROJECTS

Da Capo Music | e-Commerce website | https://dacapomusic.net

A multi-page e-Commerce website for musical accessories and instruments. Built with JavaScript, Bootstrap, CSS3, HTML5 & Photoshop. Linked to PayPal Commerce Platform for secure and smooth checkout. Accepts various payment options: credit and debit card, PayPal, Venmo, and *buy now pay later*.

Breezee | Web-based weather application | https://breezee.live

Displays current conditions and 15-hour forecast for any city in the world. Data are imported through Open Weather Map's One Call API, and the app is powered by JavaScript. The design is inspired by Neumorphism.

Adia | Band website | https://adiachicago.live

Official Webpage for Chicago-based recording artist and rock-violinist, Adia. Styled with Bootstrap and CSS. Hero section features auto-carousel of action images with previous/next buttons.

Daniel Won Portfolio | Personal website | https://danielwon.dev

Fully responsive portfolio site with focus on user interface and user experience. Built from the ground up with JavaScript, CSS3, HTML5 & Photoshop.
